## 100-K Area Facilities **HANFORD SITE**

**Your feedback  
is valuable**

Public comment period 10/20/04 – 11/19/04

### **Cleanup of 100-K Area Ancillary Facilities**

The U.S. Department of Energy, U.S. Environmental Protection Agency and the Washington State Department of Ecology want your input on an Engineering Evaluation/Cost Analysis (EE/CA) for ancillary facilities in the 100-K Area of the Hanford Site.

The K Area EE/CA evaluates alternatives for dealing with 27 ancillary structures and facilities. The facilities were used to support the production of plutonium at the K East and K West reactors in K Area. The reactors themselves will be addressed in a future EE/CA. The three alternatives evaluated in this document were: no action, demolition, and surveillance and maintenance followed by demolition.

The proposed plan is documented in *Engineering Evaluation/Cost Analysis for the 100-K Area Ancillary Facilities*, DOE/RL-2004-43.

Tri-Party Agreement  
U.S. Department of Energy  
U.S. Environmental Protection Agency  
Washington State Department of Ecology
